Introduction

I am wasting no time in this e-book here. You're looking for a simple way to get your website ranked in the search engines with as little work as possible.

Right?

Good. I am going to break down how to use [lwaylinks service](#) to do this. This service is vital to making this technique work.

First, if you haven't watched my video on this yet [watch that first right here](#). This video showcases some of my results and gives you an overview of exactly how this technique will work!

Then read the rest of this brief but powerful link building manual.

When you're ready to go on head to the next page.

Step #1 – Get 1Way Links

After you've signed up enter your account and you'll come to a page that looks like this.

#1. Just click the add more blogs button. If that isn't showing just click the “My Blogs Button.”

Simply follow all the prompts on the screen to get your first blog set up. Keep in mind the first blog isn't the only site you're going to be building traffic to.

You'll be able to send traffic to anywhere from this. That's the real beauty of this system. Links can be built to anything. We're going to focus on the blogs here though.

Step #2 – Write an Article

Write a simple article. This doesn't have to be special and in fact it doesn't have to be about anything relevant at all. You could write about what your dog had for breakfast.

What you'll want to do is make sure that it's about 350 words long.

This article is going to be posted into the blog network. From the blog network you'll generate loads of back links from this.

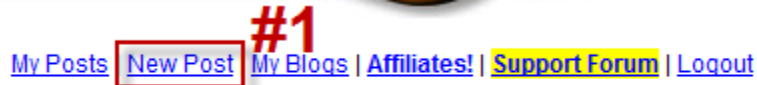

That's it! Easy enough?

In a few moments I'll show you how to turn that simple article into numerous articles. In fact, I can show you how to turn it into about 100 articles in about 20 minutes!

Step #3. Submit the Article to The Blog Network.

I am going to walk you through this part step-by-step.

#1. Click “New Post.”

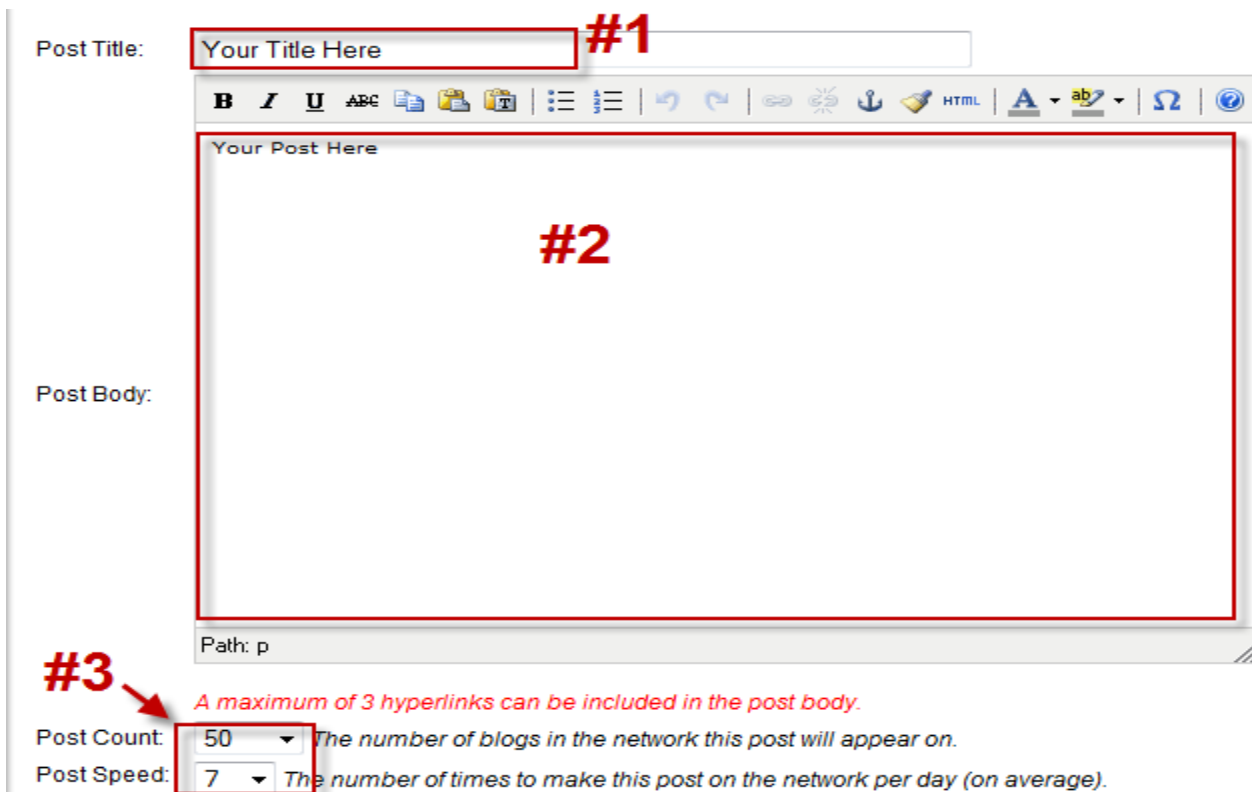

Once you get to the New Post page make sure to read the brief set of rules. Nothing major here but just abide by the network rules.

#1. Make a post title.

#2. Paste your article here. Make sure you spell check it.

#3. Select between 40-50 for post count and select 5-7 for the post speed. The post count is how many blogs will display your post. The speed is how many of those blogs will receive your post per day.

A screenshot of a web form for submitting a new post. The form includes a 'Post Title' field with the placeholder text 'Your Title Here', a large text area for the 'Post Body' with the placeholder text 'Your Post Here', and two dropdown menus for 'Post Count' and 'Post Speed'. The 'Post Count' dropdown is set to '50' and the 'Post Speed' dropdown is set to '7'. A red '#1' is placed above the title field, a red '#2' is placed in the center of the post body area, and a red '#3' with an arrow points to the 'Post Count' dropdown. A red note below the dropdowns states: 'A maximum of 3 hyperlinks can be included in the post body.' The 'Post Count' dropdown is annotated with the text: 'The number of blogs in the network this post will appear on.' The 'Post Speed' dropdown is annotated with the text: 'The number of times to make this post on the network per day (on average).' The form also shows a 'Path: p' field at the bottom.

I suggest at the end of your article you add a resource area called “About The Author.” Inside this area you should put your name or pen name and list the websites you want to promote.

Your website links should be constructed like the following using a spin technique:

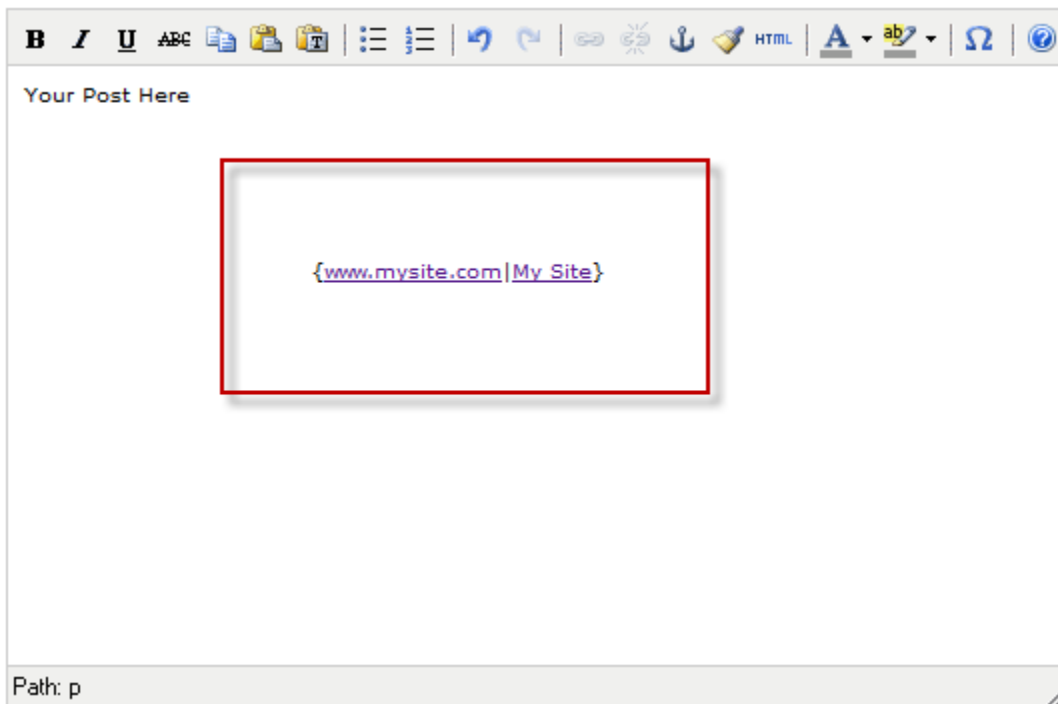

Make sure yours look exactly like this.

{www.yoursite.com|Your Main Keyword Phrase Here}

Notice the above has these weird brackets? { | } See that?

That is the spin command. What we are doing here is telling the blog network that 50 % of the time we want the blog this is getting posted on to display just the url. The other 50% it's going to display the Anchor text version of your link.

Let me show you an example on the screen.

Just make sure to use the little chain link icon on the dashboard to make the links active. It's right next to the anchor symbol.

Make sure to also separate the url and the anchor text version with a | called the pipe symbol. That's the symbol that will actually tell the system which url's to display.

Keep in mind throughout your article you can have up to 3 links done in this manner. So take advantage of this and include not just a link to your home page like this but, two additional pages.

#1. Next, submit the article by clicking Preview.

Modify only the post count and/or post rate (avoids the additional review time).

#1

Preview Post Before Submitting For Review

Then just click the submit button and your article will then be pending review.

After the review phase (usually 24 hours) you'll be approved and your article will appear in the network. If it's not approved just read why and correct it.

Then you'll start building links at the speed you selected to the amount of blogs you decided you wanted to post to.

So if you selected to post to 50 blogs at the speed of 5 per day you'll build 50 inbound links in 10 days.

What should begin happening now is quickly your site should start climbing in the search engines ranking for your main keywords.

If it's not you're either not doing something right or you've chosen too hard of a keyword selection. One thing that can help you is by joining my [NBK Underground](#) A.K.A. Niche Blitzkrieg Underground. Each week I hand select over 100 keywords for a small group of people. These keywords are based on easy to rank methods and most of them allow you to rank rather quickly in the search engines. Plus, we have a powerful group of marketers who are really going all out with the program inside there. The tactics in this e-book is just a small part of what we are doing inside Niche Blitzkrieg Underground.

Mass Article Power

Now let's talk about an easy way to take an article and turn it into several. In fact, you can turn it into 100 articles! These articles can then be used as the back bone for your submissions inside the [1 way links network](#).

Simply sign up for an account with [Best Article Spinner](#) which is yet another sweet Jon Leger tool. It's under \$100 for an entire year and if you do everything right you may not need it more than 1 year.

Now I'm not going to walk you through everything since Mr. Leger has a GREAT tutorial that will walk you through this and do it way more justice than I will.

Basically all you do is insert your pre-written article then spin the article by clicking on the suggested spin changes. In about 20 minutes you'll have a fully powerful spun article.

But, what I like to do is select that I'd like to turn it into 50 articles or more and then I have a ton of articles while doing hardly anymore work!

I then use these articles in the 1 way links network and I get away with doing so much less work. The

key to making it work is simply to give each new article you submit into the network a new title. That's it! On the next page is a recap of the video and this walk through.

Recap

This recap will bullet point each step as instructed from the video and this manual.

- #1. Do your keyword research.
- #2. Find a niche that pays well in AdSense. Make sure when you buy a domain that it matches your keywords exactly! The extension must be either .com .org or .net for this to work.
- #3. Create your blog.
- #4. Make sure your blog is optimized for your keywords. If you need help with this I highly suggest being a part of the [Niche Blitzkrieg Program](#) if you're not already as it will teach you these critical fundamentals. Make sure your to also have the site monetized whether with AdSense or affiliate products.
- #5. Sign up for [1 way links](#).
- #6. Write a 300-350 word article.
- #7. Include spun back links to your website home pages and additional pages.
- #8. Submit the article for review.
- #9. After approval your site will start to gain back links and therefore begin to climb the search engines shortly.
- #10. If you want to mass produce articles that you can use in the 1 way links network and save a ton of time grab [The Best Spinner](#) and follow the brief tutorial that comes with it. This is great if you have several sites you want to promote fast.
- #11. Repeat steps 1-8 for the next site, then the next and so on.

My results have been great so far and I am looking to add hundreds of sites into the network. Use this technique and enjoy the extra profits and the easy search engine rankings!

To your everlasting marketing success,
Michael S. Brown
